**November 16, 2018  
BOIL WATER ADVISORY**

Following this week's heavy rains, Paulding County Water System's main along Mount Olivet Road broke at the bridge crossing over Pumpkinvine Creek. This break resulted in significant loss of water and low water pressure serving our customers in the following areas: Walraven Place, Polk Path, Polk Lane, Mount Olivet Road, McPherson Loop, sections of McPherson Church Road, Willow Springs Road, Willow Springs Drive, Gore Road, Martin Path, Juniper Path, Clover Path and Whippoorwill Path, the Jackson Heights, McPherson Pointe, McPherson Trace, McPherson Woods and Willow Ridge subdivisions.

Customers in those areas should "boil" all water prior to use for drinking, cooking, or preparing food. The water should be boiled for at least one minute after reaching a rolling boil. Citizens should continue to boil their water until they are notified that the water system has been restored to full operation, and that the microbiological quality of the water in the distribution system is safe for human consumption.

The Paulding County Water System is working to restore pressure in the affected areas, and will sample those areas to affirm that there is no contamination. The Georgia Environmental Protection Division will advise Paulding County when the advisory can be lifted.

We appreciate your patience. Please contact Paulding County Water System at 770-445-2761 with questions.
